**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Slood (US 6508558).

Slood shows a light reflector including a reflective base plate upon which reflective cones(15) having flat angled faces are formed.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior

art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wehr (US 1732822) in view of Arnott (US 3954324).

Wehr shows a light reflector including a reflective base(21,27) plate upon which reflective elements(23,28) are formed. Note that layers 23 and 28 may also be considered as the base plate upon which cones are formed. Wehr further shows a mount or side wall, each of which has a non-transmitting layer(18,20,26) which has an open end to which a lid(12,25) is removably mounted.

Wehr does not teach the reflecting elements to be multifaceted cones. However, such are common and an example is shown by Arnott (see fig. 1--note also the conical shape shown in fig. 2). It would have been obvious to the ordinarily skilled artisan at the time of invention to use cones such as those shown by Arnott as Wehr's reflecting elements in order to provide bright retro-reflection in a particular directional field.

5. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wehr (US 1732822) in view of Arnott (US

3954324) as applied to claim 1 and further in view of Michler (US 5039200).

Wehr in view of Arnott does not show the base plate to be cylindrical. However, such is shown by Michler in fig. 2). It would have been obvious to the ordinarily skilled artisan at the time of invention to make the base plate cylindrical so that the reflector could be used on a walking stick or cane as shown by Michler.

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Kazdan, Janovec, Gustin, Bergen, and Mihalik all show various light reflectors.
